■ **THE ROAD TO UCP700**

Since the 1962 revision of the UCP, it has been revised every decade or so, making it likely that a revision of UCP600 (2008) is forthcoming. Anticipating the coming revision, *DCW* has initiated discussions regarding the nature and scope of the revision. In this issue, Nesarul Hoque puts forth his early expectations for the next iteration of UCP. *DCW* then reports on aspects identified by LC specialists and opens up the process by inviting readers to select topics worthy of a place on their “UCP700 Wish List” and deserving of consideration when the rules are next revised.
